

PRO-LIGHT™ 1

Screen Exposing Units with Focused Fluorescent Light Source

*Pro-Light 1 Floor Model
shown with optional stand
and storage shelf*

Tabletop model

ADVANTAGES

- Flexible rubber blanket maintains complete contact, prevents distortion and returns to its original shape after exposure
- Focused lamps direct maximum exposing energy to screen
- Maintenance-free vacuum motor holds positives securely in place during exposure
- Accurately hardens wide variety of emulsions
- Tabletop or floor models available

The economical, easy-to-use Pro-Light™ 1 series of exposing units features full vacuum frames and banks of focused fluorescent tubes to create an evenly distributed light profile, yielding professional results regardless of your level of experience.

A photo-grade clear glass plate and flexible rubber blanket deliver sharp, accurate exposures while undercutting is minimized. The flexible rubber blanket maintains complete contact between the film positive and mesh, and returns to its original shape when exposure is completed. Pro-Light 1 units include a 15-minute analog timer with automatic shutoff for operational convenience.

PRO-LIGHT™ 1

Screen Exposing Units with Focused Fluorescent Light Source

Standard Features

- Focused banks of fluorescent tubes
- Flexible rubber blanket
- Photo-grade glass plate
- Quiet, maintenance-free vacuum motor
- 15-minute timer with automatic shutoff
- Heavy-duty steel construction

Options and Accessories

- Stand
- Storage shelf
- Digital timer
- Spare parts package
- 220 V, 50 and 60 Hz models available

Pro-Light 1

with self-contained light source and vacuum frame

CAT. NO.	DESCRIPTION	MAX. FRAME O.D.	ELECTRICAL*	HP	AMPS
