printing supplies and equipment* ◆

Complete prepress services ◆

AWT.
World Trade, Inc.

*Quick turnaround • Competitive pricing
Quality craftsmanship*

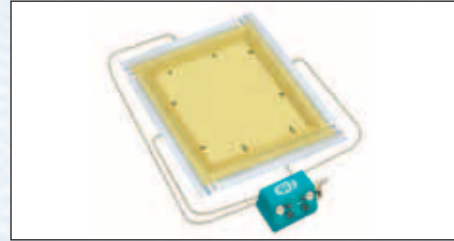

From creating custom screen images to constructing ready-to-print screens, The A.W.T. World Trade Group is your complete source of screen making services. Let our decades of screen printing industry experience work for you.

Outsource your imaging work — just give us your art or film and desired specifications and we'll give you a top-quality custom screen. It's a great way to accelerate the productivity of your shop.

Don't let your press sit idle while you take time with screen prep functions like making frames, stretching mesh, coating and shooting, washing out, checking for pinholes and blocking out.

A.W.T.'s custom screens are ready for your press.

SCREEN MAKING AND PREPARATION

Screens made to YOUR specifications.

NEW ACCURATE SCREENS

Emulsion-ready mesh and frames

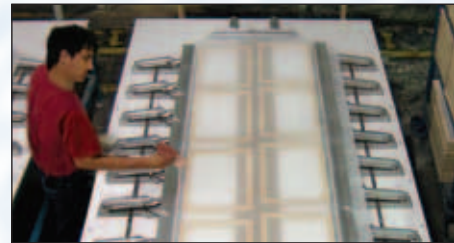

Available in a range of fabric and thread diameters, A.W.T. screens will uniform stretch to almost any tension. They may be pre-tensioned to specific tolerances using any one of the many frames, including aluminum, self-tensioning, conical, extruded, wood and roller frames.

Restretch your screens

A.W.T. will take your emulsion-ready mesh frames and strip, clean, regrind and restretch them to your specific requirements.

Press-ready imaged frames

A.W.T. screens can be produced to your specifications, imaged to your film positive and made press-ready. They have even emulsion or films, consistent mesh tension and can be imaged in a wide range of sizes — up to any size you require.

Solid, lightweight, long lasting, reusable frames.

PRECISE, CUSTOM FRAMES

- Made to order
- Solid, lightweight and long lasting
- Wide variety of types — tubular aluminum; wood; Chase-style, self-tensioning; roller frame; CD; 3D; specialty; oversized
- Corner gussets and pre-bow options
- Available in a range of channel sizes and wall thicknesses

Extensive selection of quality fabrics.

QUALITY, STABLE SCREEN FABRIC

- Optimum stability for consistent tension levels
- Extensive variety of mesh counts, thread diameters and weaves available
- Fine line or halftone exposure
- Hundreds of mesh counts and types are available

ALL TYPES OF INDUSTRIAL APPLICATIONS

Complete services for large, industrial frames.

- Automotive
- CDs
- Glass
- Textile
- Graphics
- 3D

- Complete training from making and imaging screens through the complete screen printing process
- Step-by-step approach to help you confidently develop your screen printing business
- Install and setup single machines or complete systems
- Staff's problem-solving attitude helps you find answers to tough screen printing problems

ADDITIONAL SERVICES

Widest selection of specialty frames.

- Restretch screens
- Reclaim and reimage old screens
- Manufacturer of specialty frames
- In-house screen imaging training
- Art preparation

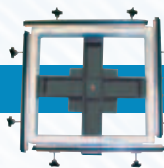

Call
773.777.7100
 or email
sales@awt-gpi.com
 for a quotation
 or more information.

Due to the great number of variables involved in making a single screen, it is impractical to publish a price list. A quote is based on the size and proportions of both your art and screen requirements. Our staff can provide preliminary quotes by telephone or email, and final quotes by examining your art, films and/or blueprints.

DO-IT-YOURSELF

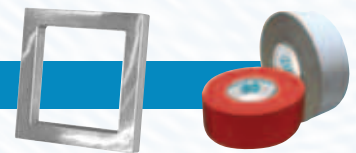

If you'd like to construct and stretch frames inhouse, A.W.T. also manufactures a complete line of frame-making tools, supplies and equipment — ranging from raw wood, fabrics and frames to adhesives, frame stretching tools and tape.
