- Weight: 26,180 lbs.

Full view of Klemm Derby L-430

This Klemm was used for only a short time.

This machine was purchased new to print plastisol transfers, paper and vinyl transfers, water applied transfers and other items – which is why the dryers operate at such high temperatures.

A few years after buying the machine, the printer changed the paper he used and the web won't work with it. He changed to sheet-fed presses.

The machine is available immediately.

It is located in Europe. It will take 1-2 weeks to disassemble and load into a container. It will take an additional 3-4 weeks in-transit to any place in the USA.

Price includes complete unit and door-to-door delivery to your facility. You will be responsible for unloading the container.

A.W.T. doesn't install this Klemm unit. Klemm will install it or, we have another service company available.

You may go to see the machine in operation and, if you send your material, they will run a roll if you wish (there will be a small charge for this which will apply to the purchase price).

SELLING PRICE: \$235,000
(Price for new Derby: approx. \$795,000) FOB USA

Terms: 50% down, 40% in 4 weeks and balance of 10% (\$23,500.00) before delivery.
